SLIDEDIETS PROGRAM

SlideDiets is our signature workshop. It focus on the theories and best practices of presentation slide design. There are two options for this program.

CUSTOMIZED SLIDEDIETS WORKSHOP

This course is designed to provide tailored improvement techniques to an organization. We review 150–300 sample slides from the client organization, looking for opportunities and techniques that will allow the client to produce better, more powerful slides, even without a design team.

We discuss how to simplify content without losing meaning, how to communicate more visually, and some software tricks that will help slides work harder.

The content is delivered in a before & after methodology and interactive segments. This workshop highlights areas for improvement, teaches the skills necessary, and then presents a final product.

2.5 hour virtual workshop, available in segments – contact for pricing

SLIDEDIETS PRIMER (NON-CUSTOMIZED)

This is the non-customized version of the SlideDiets Presentation. Using before & after examples from our body of work, we cover topics such as narrative creation, content reduction strategies, slide development theory and practice, and basic technical and design skills.

1.5 hour webinar – contact for pricing
